

SUMMARY

Data professional with hands on experience in research, data analysis, predictive modelling, and communicating ideas clearly. Looking to use my research, analytical, and problem-solving skills in a fast-moving environment where I can contribute to business growth.

PROFESSIONAL EXPERIENCES

Toir Business Solutions Pvt Ltd – Research and Data Analyst Feb 2024 – May 2025

- Worked as a freelance research and data analyst, finding and validating information from open-source platforms based on each project's needs.
- Handled raw data by cleaning, organizing and prepared reports, dashboards, and presentations using Excel and Power BI to communicate insights clearly to business stakeholders.
- Contributed to multiple projects by regularly updating datasets and ensuring the information stayed

Geojit Financial Services Ltd – Product and Data Analyst Intern May 2024 – Jul 2024

- Worked as a data analyst intern in fundamental research department and worked as product analyst intern in digital initiative department at Corporate Head Office.
- Assisted in gathering and restructuring data to prepare equity research report in fundamental research department.
- Analysed and evaluated data and reported bugs in various online investment products in the digital initiative department.

SKILLS

Programming & Language: Python | SQL | HTML | CSS

Technical Skills: Data Management | Research Analysis | Data Analytics | Data Mining | Web Scraping | Pitch Deck | Business Analysis

Libraries: NumPy | Pandas | Matplotlib | Seaborn | Plotly | Scikit-Learn | TensorFlow | Keras | NLTK |

Tools: Excel | MS Word | Power Point | Power BI | Power Query | IBM SPSS | Gen AI

Soft Skills: Communication | Presentation | Management | Flexibility | Time Management

PROJECT

Global Data Center Risk Scoring for New Data Centers | Research & Risk Modelling Project

[GitHub](#)

- Analysed global datasets to assess environmental, operational, physical, and cyber risks affecting potential data-center locations using Python.
- Cleaned and integrated multiple datasets to develop a city-level risk scoring framework, visualizing insights with Excel and Power BI dashboards.
- Building machine-learning models to predict future risk levels across locations to support data center site selection and infrastructure planning.

Gold Loan Credit Risk Prediction | Machine Learning Project

[GitHub](#)

- Built a gold loan credit risk analysis model using Excel, Python, pandas, and NumPy for data cleaning, preprocessing, and feature preparation.
- Created exploratory visualizations with Matplotlib and Seaborn to identify key patterns, trends, and risk factors affecting loan approval and repayment behaviour.
- Developed and benchmarked Logistic Regression and XGBoost classifiers, achieving **95.18 %** and **95.5%** accuracy respectively; selected Logistic Regression as the final model based on superior performance.

EDUCATION

Diploma in Data Science

(2025- 2026)

- Edure Learning, Kochi

Master of Business Administration (MBA) -Finance and Marketing

(2023 - 2025)

- APJ Abdul Kalam Technological University, Trivandrum

Bachelor of Commerce (B.com)-Computer Application

(2020-2023)

- Mahatma Gandhi University, Kottayam

PROFESSIONAL CERTIFICATION

- **Business Analyst Professional Certification**, Microsoft
- **Advance Excel Training**, Strategist Data Analytics
- **Microsoft Power BI Training**, Strategist Data Analytics
- **Financial Markets**, Yale University
- **Financial Modelling**, LinkedIn Learning
- **Investment Risk Management**, Coursera
