SUMMARY

Data professional with hands on experience in research, data analysis, problem solving, and communicating ideas clearly. Looking to use my research, analytical, and problem-solving skills in a fast-moving environment where I can contribute to business growth.

PROFESSIONAL EXPERIENCES

Toir Business Solutions Pvt Ltd – Research and Data Analyst **Feb 2024 – May 2025**

- Worked as a freelance research and data analyst, finding and validating information from open-source platforms based on each project's needs.
- Handled raw data by cleaning, organizing and prepared reports, dashboards, and presentations using Excel and Power BI to communicate insights clearly to business stakeholders.
- Contributed to multiple projects by regularly updating datasets and ensuring the information stayed

Geojit Financial Services Ltd – Product and Data Analyst Intern **May 2024 – Jul 2024**

- Worked as a data analyst intern in fundamental research department and worked as product analyst intern in digital initiative department at Corporate Head Office.
- Assisted in gathering and restructuring data to prepare equity research report in fundamental research department.
- Analysed and evaluated data and reported bugs in various online investment products in the digital initiative department.

SKILLS

Technical Skills: Research Analysis| Data Analytics| Financial Analysis | Pitch Deck | Business Analysis

Libraries: NumPy | Pandas | Matplotlib| Seaborn | Plotly | Scikit-Learn

Tools: Python |Excel |MS Word |Power Point| Power BI| Power Query| IBM SPSS|SQL

Soft Skills: Communication | Presentation | Management |Flexibility | Creative Thinking|

PROJECT

Global Data Center Risk Scoring for New Data Centers | Research & Risk Modelling Project GitHub

- Analysed global datasets to assess environmental, operational, physical, and cyber risks affecting potential data-center locations using Python.
- Cleaned and integrated multiple datasets to develop a city-level risk scoring framework, visualizing insights with Excel and Power BI dashboards.
- Building machine-learning models to predict future risk levels across locations to support data-center site selection and infrastructure planning.

Used Car Price Prediction | Machine Learning Project GitHub

- Built a used car price prediction model using Multiple Linear Regression with Scikit-learn, analysing features such as vehicle specifications and market attributes.
- Performed data cleaning, exploratory analysis, and feature understanding using Pandas, NumPy, Matplotlib, and Seaborn.
- Evaluated model performance using Mean Squared Error (MSE) and R^2 score, measuring how accurately the model

EDUCATION

Diploma in Data Science and AI **(2025- Present)**

- Edure Learning

Master of Business Administration (MBA) -Finance and Marketing **(2023 - 2025)**

- APJ Abdul Kalam Technological University, Trivandrum

Bachelor of Commerce (B.com)-Computer Application **(2020-2023)**

- Mahatma Gandhi University, Kottayam

PROFESSIONAL CERTIFICATION

- **Business Analyst Professional Certification**, Microsoft
- **Advance Excel Training,** Strategist Data Analytics
- **Microsoft Power BI Training,** Strategist Data Analytics
- **Financial Markets,** Yale University
- **Financial Modelling,** LinkedIn Learning
- **Investment Risk Management,** Coursera
